## HAMPSHIRE BIODIVERSITY PARTNERSHIP

Hampshire is one of the richest areas for wildlife in England. The Biodiversity Action Plan for Hampshire is an exciting new approach to maintaining and enhancing the county's natural assets.

The Hampshire Biodiversity Partnership embraces a wide range of organisations all working together for nature conservation. The Partnership has written the Biodiversity Action Plan to review the status of all habitats and species in Hampshire and set out a framework for action. For the first time, detailed targets will be set and conservation action will be co-ordinated and monitored.

The Biodiversity Action Plan for Hampshire:

- describes Hampshire's biodiversity
- identifies habitats and species of priority concern
- explains how detailed action plans will be prepared
- reviews important issues that affect biodiversity in Hampshire
- promotes a strategy for managing information and data
- sets out action for raising awareness of biodiversity

It is essential reading for anyone concerned about nature in the countryside or urban areas, and all those involved in planning and managing the future of Hampshire's biodiversity.
